 TODAY (S14)

Phase 3 Overview
+ Setting the Stage

The build phase begins · layout and equipment gets concrete · “settling” in at Design Lab

Phase 3 Today! here

→ BUILD WEEKS

Work with your group to build and exhibit your art installation!

Exhibition Date: Thu, July 2

Demolition Date: Fri, July 3

Everything before today was about deciding what to make. From here on it is about making it work for the audience!

Phase 3 Overview

Phase 3 Overview

TOMORROW

- Jacco: On Art [&] Science
- Exhibition Logistics & Group Work
- Building at the DesignLab

→ WEEK 10

- Building at the DesignLab
- Location Scouting
- Daily group check-in w. TAs/Lect.
- Equipment Reservation

→ WEEK 11

- Moving to Black Brick
- Public Exhibition
- Demolition

- ✓ **Buddychack 3**
- ✓ **Phase 3 Deliverables**

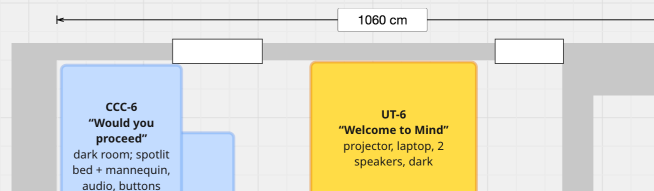

The Space

DesignLab & Black Brick

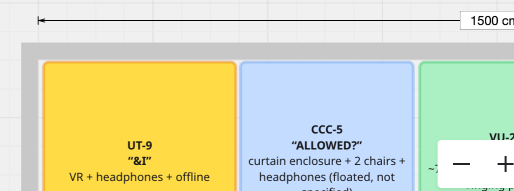

[illegible]

Space Planning

Black Brick: 🌑 Dark Space (WiFi)

Black Brick: 😊 **Bright Space (no WiFi!)**

While at DesignLab

- **The space is finite and shared.** Be respectful and considerate; also make use of the social vibe!
- **We are guests.** Take care of what you borrow and ASK what you may use.
- **Workshop Use? Safety Badge.** You cannot enter the workshop without a safety badge!
- **Settle next to exhibition neighbors.** This gives you a better idea how installations impact each other.

While at Black Brick

- **The space is finite and shared.** Be respectful and considerate; also make use of the social vibe!
- **We are guests.** Workspaces of artists are no-go zones unless invited upstairs!
- **We bring tools and materials.** We do not eat into their budget or resources!
- **Get comfy too.** We spend some time there together; feel free to get comfortable within reason (and within the spaces we are given)

Exhibition Evaluation

Exhibition Evaluation

VISITORS (50%)

Rate your work on **three criteria**, 1–7. Their averaged scores are half your exhibition grade.

- **Concept** — is it thought-provoking?
- **Engagement** — does it evoke an emotional response?
- **Craft** — does the technology feel purposeful?

Peer reviews from other students feed this too.

ASSESSORS (50%)

Rate the **same three criteria** with deeper descriptors — plus one extra they assess alone:

- **Concept · Engagement · Craft** (same as visitors)
- **Facilitation** — does the team do a good job in making their installation well-visited and reliable?

*Exhibition is 25% of your group grade. The other 25% is the final portfolio.
Together: half your group grade is decided in Phase 3.*

Exhibition vs. Portfolio

THE EXHIBITION RATES THE WORK **IN SPACE**

Concept, Engagement, Craft, Facilitation are all judged from the **live experience** — what a visitor encounters and feels in the room.

It does not reward your process, your struggle, or how clever your code is behind the scenes.

THE **PORTFOLIO** IS WHERE PROCESS LIVES

Your decisions, trials, turning points, and reasoning belong in the portfolio (the other 25%).

Two different deliverables, two different jobs. Don't try to make the installation “explain” its own process — make it *work*.

Build the installation for the visitor. Document the process for the reader.

Next Steps

Lock These Down This Week

1 · SPATIAL FOOTPRINT

Understand your zone and confirm your installation fits within your installation concept.

2 · SOUND SITUATION

In a shared space, open speakers bleed into neighboring spaces. Decide now: speakers (with range and volume limits) or headphones.

3 · EQUIPMENT NEEDS

What do you already have? What do you still need to organize? **Check what can be lent out.**

4 · PLAN YOUR DAYS

Map out W9 Friday and all of W10 **before you leave today.** What happens each day? Who does what? What needs to be done by when?

Setting the Stage

The room is part of the work

The Room Is Part of the Work

APPROACH

How does a visitor **arrive** at your piece? What do they see from three metres away that pulls them in?

THRESHOLD

The moment they **enter** your space. What signals “the experience starts here” — light, sound, a floor marking, a framing?

SIGHTLINES

What's **visible**, and what's hidden until the right moment? Neighbouring works leak light and sound — design with that in mind.

Remember SII — the approach path and the first impression are not just decoration. They are part of the experience.

Black Brick: 🌑 Dark Space (WiFi)

Plan: W9 + W10

WEEK 9 — THU + FRI ONLY

Today (Thursday): planning with your team
(also: discuss your Buddycheck assessment)

Tomorrow (Friday):

- Morning check-in with each other (~3-5 min per person): who does what today?
- Building and testing
- End-of-day sync: what shipped, what's an issue?
- Daily check-in (~10 min, traffic-light status)

On every build day you have a short check-in with your TA, around 10 minutes. It is not a presentation, and it is not graded. Its only job is to catch problems early.

You give a quick status using a traffic light and name your current blocker:

- **Green** - on track, nothing in our way
- **Yellow** - something is slowing us down
- **Red** - we are stuck and need help

If you are yellow or red, a TA may sit with you longer or flag it to the instructor, so you get help in time for that week's milestone.

Showing up is required. We cannot help with a problem we cannot see. You cannot count on our support later on if you were not present for a group check-in.

WEEK 10

- **Mon-Thu:** build, integrate, internal run-throughs
- **Space Concept Review:** TA or instructor visits your installation where it stands
- **Black Brick space allocation confirmed** — you get your exhibition footprint and dimensions
- **Friday: asset freeze** — code stable, no new features after this
- **Friday: W11 logistics briefing** — transport + build-up plan

Daily routine: morning check-in → build → TA check-in

Social Stuff!

All work and no play? Yes Play!

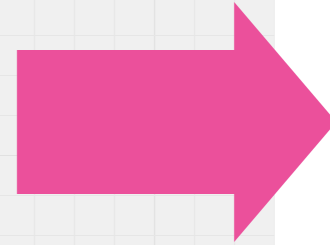

3): UX Trials

le PDFs and templates are added as the phase unfolds — check back

audiences. Across three internal exhibitions — each followed by a UX Trial Report
Week 8, your portfolio should show the arc from first concept ideations to a

r for decision making!
