

S10: Mid-Process Review Workshop

Art [&] Impact · Week 6

In This Session

BLOCK	CONTENT	DURATION	AI ZONE
Activity	Silent Peer Observation	30 min	 No AI
Activity	Observation Card Analysis	10 min	 No AI
Break	—	10 min	—
Group Work	Self-structured work	remaining time	 Brain-first

UX Trial #2 takes place next week: **S11, Week 7 Friday, afternoon.**

A brief note:

In-Module Survey Results

Silent Peer Observation

Silent Peer Observation — How It Works

THE FORMAT

Step 1: 6 min — 2-3 students from another team interact with your prototype. No guidance, no explanation, no hovering; observe only!

While they interact: host team fills in the **observer card** — silently 🤫 — in real time.

Step 2: 6 min — Visitors fill in **visitor card** independently.

Switch — Your team visits another team and repeats. We do one switch only!

TWO CARDS — FILLED IN SEPARATELY

Not critique, not suggestions — different from the S8 feedback cards.

Visitor card (*visitors fill in after interacting*)

- What did you do first?
- What did you expect that didn't happen?
- What did you feel?

Observer card (*host team fills in while watching*)

- What did you see them do first?
- Where did they slow down or seem lost?
- What surprised you?

Resist the urge to explain — even when it's uncomfortable.

Silent Peer Observation

🕒 6 min

Visitors interact, host fills in observer card

No guidance, no explanation.

What did you see first?

Where did your visitors slow down?

What surprised you?

🕒 6 min

Afterwards: Visitors fill in visitor card

What did you do first?

What did you expect that didn't happen?

What did you feel?

Restart

Now switch!

Card Analysis — What to Do

Read alone first — each person reads all cards (visitor cards + observer notes) silently and marks what surprised them. No discussing yet.

What to look for: the same behavior, the same gap, the same feeling appearing across cards. Does the visitor card match what you observed, or contradict it? Either is useful. One occurrence is anecdote. A pattern is a signal.

Then as a team: agree on what to work on first during group time. Write it — one sentence. You may have more than one thing to address, but leave with a clear first priority!

Leave with a direction — not just a list of problems.

Card Analysis

10 min

Read alone → identify one problem as a team

Read silently first. Mark what surprised you.

Look for patterns — same behavior or feeling across cards.

Agree on **one problem**. Write it — one sentence.

Break

🕒 10 mins

Reminder: Phase 2 Arc

UX TRIAL #1

S8 · Week 5 · Fri afternoon

Paper prototyping, sketches, Miro boards, roleplay, conceptual walkthrough, ...

No built prototype required.

Does your design question produce the intended experience — even on paper?

UX TRIAL #2

S11 · Week 7 · Fri afternoon

Working interaction expected.
Structured feedback.

Something that runs.

Does the interaction do what you designed it to do?

UX TRIAL #3

S14 · Week 8 · Fri afternoon

Iteration of your most important interaction. Phase 2 closes here.

Exhibition-ready planning.

At this point you have a tested plan for your art installation; ready to turn complete in Phase 3.

Each trial answers a question. Each answer should drive your concept forward and make it more concrete.

Group Work

Self-Structured. Prepare for next week's UX Trial!

Brain-first

Until end of session

Art [88] Impact

See you at S11 – Week 7, Friday!
