

S6: Statement Presentations

Art [&] Impact · Week 3 · Last Week of Phase 1

Presentation Schedule

Session Structure

PRESENTATIONS

● No AI

**5 min presentation + 5 min critique
+ 3 min peer feedback**

After each presentation, we discuss impressions, and everyone fills in a brief anonymous survey.

Results are shared with the presenting team!

WORK TIME (AFTERNOON)

● Brain-first

Meet with your group to complete phase 1 deliverables. Use the feedback from your presentation to tweak your work.

Complete also your personal deliverables (Buddycheck + AI & Me submission on Canvas)

Feedback Form

Fill in after each presentation for other groups

You can also check the Canvas announcement for the link.

*Phase 1 deliverables due tonight at 23:59
But better: by the end of today's session!*

Presentation Requirements

- Your **artistic statement**
- **Concept** and **interaction sketch**: what does a visitor do?
- Declared **technology track** + rationale
- Use any presentation style that helps convey your statement

Presenting

🕒 5 min

05:00

Start

Critique

🕒 5 min

POSITION CLARITY

Can you state it in one sentence?

Could someone disagree with it — or
is it still a description?

PERSONAL/SPECIFIC?

Does it come from this team
specifically?

Or could any team have made the
same claim?

PRESENTATION PERFORMANCE

Presented with conviction; able to
respond to critique with
background/thoughts

05:00

 Rest of Session

Work Time

- Use the feedback from your presentation to strengthen your statement and concept
- Complete also your personal deliverables (Buddycheck + AI & Me submission on Canvas)

NOTION PORTFOLIO SECTIONS *(TEAM)*

1. **Artistic Statement:** ~200–400 words. Position, not a description. Written for a public reader.
2. **Concept** — What the audience experiences in your installation plus a rough spatial sketch and your blocking question(s) (will be answered in phase 2).
3. **Technology Track** — Track name, technique rationale (a paragraph), one reference work with a note on what you take from it.

Due Friday by 11:59pm Points 10 Submitting a file upload File Types zip

Submit your team's Notion portfolio (via the export feature). It must include your artistic statement and technology track rationale. Make sure everything is archived into a single ZIP file for submission.

Use the following export options:

- Export format: Markdown & CSV
- Include content: Everything
- Include subpages (ON) and create folders for subpages (ON)

What your portfolio must contain

Your portfolio is built from the work you have already done in Week 1 and Week 2. By the time you submit, you are not starting from scratch; you are polishing and completing what you have.

Section	Content	Submission Details
Artistic Statement	The statement is written for someone who knows nothing about your process — a visitor to the exhibition, a reader of the portfolio, someone who encounters your work without any context. Write for that person. A strong artistic statement does three things: It states a position. The statement is not a description of what you built but an account of what the work means and what it is trying to say. It is personal. Your statement should only be possible from your team's specific angle. It draws on the inward lens — the particular experience, obsession, or perspective that brought you to this concept rather than any other. It accounts for the audience. A statement about interactive art has to include what happens to the person who encounters the work. Not what you hope they feel but what the work is designed to elicit.	• 200–400 words. • Written in plain, accessible language. Not academic, not promotional. • In the first person plural (we) or the third person. • Not addressed to the course instructors. Write as if it will be published alongside the work.
Concept	Your concept section builds directly on your Week 1 concept draft. By the Phase 1 submission, it should reflect some refinements you made along the way. Add the following to your existing concept draft: Rough spatial sketch: A drawing of what someone physically encounters: where things are, how the space is structured, where the audience moves or stands. Does not need to be to scale or technically resolved. Include it in the portfolio as an image — photograph or scan is fine. Blocking question: The single question that, if unanswerable, would break the concept.	• Working title • One-sentence premise • Audience scenario • Theme relationship • Rough spatial sketch • Blocking question
Technology Track	Your technology track section is the content you submitted in Week 2, now finalised and placed in the portfolio. If your track has changed since Week 2, note the change and explain the reason. 1. Track name — Code & Visuals / Real-Time 3D / Projection & AV / Physical + Digital 2. Technique rationale — one paragraph explaining why this track suits your concept. 3. Reference work — one existing artwork or project that uses a similar technical approach, with a brief note on what it does and what you take from it.	• Track name • Technique rationale • Reference work

You are also encouraged to draw from the your individual AI & Me material to discuss how the group uses (or opposes) the involvement of GenAI for their work!

Art [88] Impact

Phase 1 complete.

Phase 2 begins Monday!
