

S7: UX Trials + Persona Workshop

Art [&] Impact · Week 4 · Phase 2 Start!

In This Session

BLOCK	CONTENT	DURATION	AI ZONE
Lecture	Phase 2 Overview · UX Trials · Design Questions	30 min	—
Workshop	Persona Workshop (prep + round 1)	55 min	 AI required
 Break	—	15 min	—
Workshop	Persona Workshop (round 2 + debrief)	45 min	 AI required
 Break	—	10 min	—
Activity	Translation: from Statement and Concept → Design Questions	45 min	 No AI
Close	Post Design question to MS Teams channel	5 min	—

You leave today with a committed design question ready for next week's first UX trial exhibition (S8).

Phase 2: UX Trials!

From “*what do we want to say?*”

to “*does what we’re making actually say it to a real audience?*”

The work now exists in relation to an audience
— not just as a concept!

What Changes in Phase 2

Artistic Statement

Weeks 1–3

What do you want to say?

Position sentence · Artistic statement ·
Tech track commitment

*What does your team want to say, and
how will you say it?*

UX Trials

Weeks 4–8

*Does what you are making actually say it
to a real audience?*

3 UX trials · Design questions ·
Documented in your Portfolio

Does your concept work in practice?

Phase 2 Arc: Three UX Trials

UX TRIAL #1

S8 · Week 5 · Fri afternoon

Paper prototyping, sketches, Miro boards, roleplay, conceptual walkthrough, ...

No built prototype required.

Does your design question produce the intended experience — even on paper?

UX TRIAL #2

S11 · Week 7 · Fri afternoon

Working interaction expected.
Structured feedback.

Something that runs.

Does the interaction do what you designed it to do?

UX TRIAL #3

S14 · Week 8 · Fri afternoon

Iteration of your most important interaction. Phase 2 closes here.

Exhibition-ready planning.

At this point you have a tested plan for your art installation; ready to turn complete in Phase 3.

Each trial answers a question. Each answer should drive your concept forward and make it more concrete.

What Is a UX Trial in This Course?

Your artistic statement is the anchor of your intention for UX trials!

NOT A USABILITY TEST

A usability test asks:

“can someone use this?”

A UX trial asks: *“does this create the intended experience?”*

AN EXPERIENCE INVESTIGATION

Does the audience feel what you intended? Does the interaction invite the behavior you want to design for?

LEGIBILITY AT FIRST CONTACT

Does the concept come across somehow to someone who knows nothing about it?

The question is not “did they understand it?” — it’s “did they feel it?”

From Intention to Design Question

99 Intention

“Our installation explores datafication and identity.”

Describes what the work is *about*.

True. But also Untestable.

Anyone could agree with this – or just say “okay”.

Design Question

“Does this interaction make someone feel like they are reduced to data – without us explaining the concept to them?”

Questions what the work *does* to an audience.

Someone can give you feedback on this!

UX Trial Report Format

1 · QUESTION TESTED

What specific design question was this trial investigating?

"Does the sound make visitors curious and uneasy?"

2 · METHOD USED

How did you try to answer it? What did you observe or ask?

Observation + 3 verbal self-reports after their trial

3 · FINDING

What did you actually observe or hear?

"Visitors walked past — one stopped only after also a visual was triggered"

4 · CHANGE MADE

What did you decide to do differently as a result?

"Trigger the sound 3 seconds before the visual and increasing the base component trigger a feeling of unease."

These are VERY brief examples; your notes should provide more details — and make use of sketches, photos, etc to document your trials

Phase 2 Portfolio: Three Deliverables

UX TRIAL REPORTS

Minimum 3 – one per trial

Design question tested · Method ·
Finding · Changes made

Each report shows a structured testing loop. The three together must convey **progression** – not fully isolated events.

Include visual material.

INSTALLATION CONCEPT

Updated at end of Phase 2

Working title · Premise (updated) ·
Audience scenario (what a visitor does, step by step) · Spatial plan and sketches · Note on concept evolution

Again: Include visual material.

TECHNICAL DECISIONS

Running log of key choices

Tools and tech track · At least one key interaction decision with rationale ·
Known risks or unresolved constraints

Why the work was made the way it was – not a building manual.

These three tell one story: the questions you started with, what you tested, what the installation plan has become as a result.

Next Friday Afternoon

S8 · Week 5

UX Trial #1

*Your design question meets
an audience — each other!*

WHAT TO BRING

Your design question (submitted today) and material you might need to help answer it.

NO PROTOTYPE REQUIRED

You are testing the concept — not necessarily a built thing yet.

PLAN WHAT YOU WILL TEST

Before S8: agree as a team on how you will run your first trial. What method will you use? What exactly will you show or describe — and in what order?

WHAT YOU'RE LOOKING FOR

Does the experience you describe produce any version of the intended feeling? Where does it break down? Do not go for mere 'functionality' questions.

Trial session participation is mandatory!

Persona Workshop

Three AI personas: Thought partners, not answer machines.

Three Personas

CRITICAL ART CRITIC

Provides feedback about the 'outer lens' we discussed in Phase 1; artistic tradition and context

"Does the concept hold up under scrutiny?"

Targets: concept sounds good but can't survive a precise question.

NAÏVE AUDIENCE MEMBER

Pushes you to see your concept from the point of the audience

"Does it consider the audience perspective?"

Targets: concept makes sense to the team but not to a visitor who just walked in.

INTRA-TEAM MEDIATOR

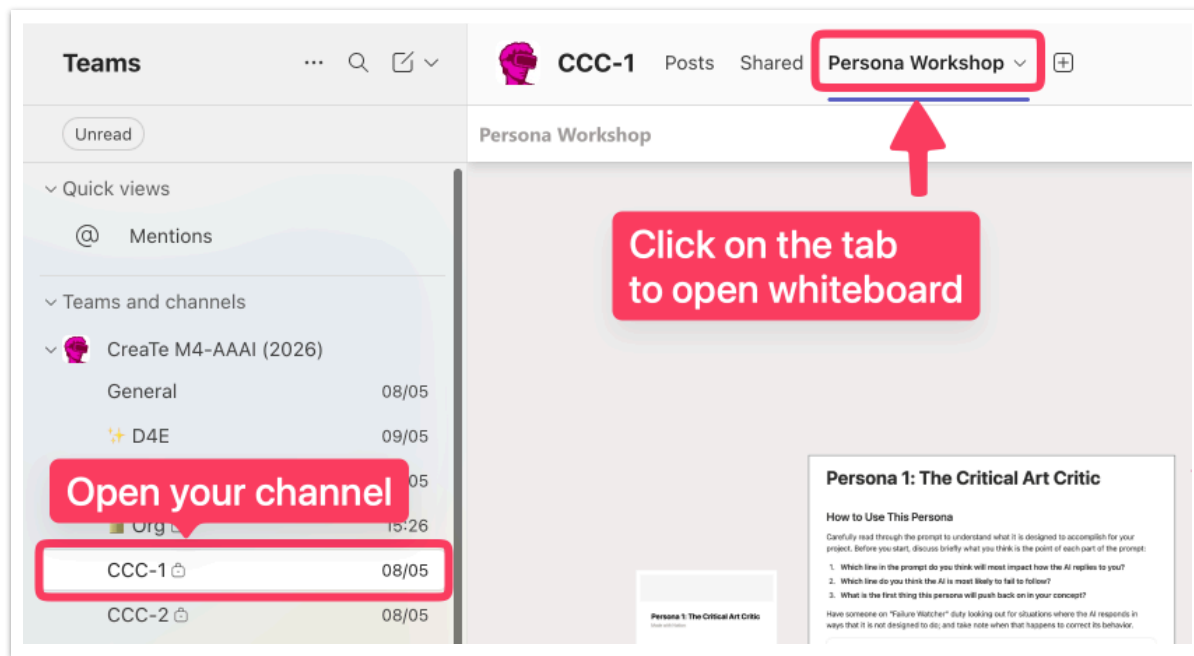

For groups using a shared word to mean different things.

"Do we actually agree?"

Targets: apparent consensus built on miscommunication

Each designed as intervention for your creative process, not a search engine.

Use any LLM of your choice and start the conversation by copying the prompt as your first message.
You'll find links to the prompt on your team's workshop whiteboard (on MS Teams)

A Warning About the LLM You Are Using

Different chat LLMs will perform differently with the persona prompts. More sycophantic models (ChatGPT-4o for example) might quickly resort to praise or will generate ideas for you.

Look out for such moments and remind it to stick to its original prompt role!

This Workshop Is Part of SUTQ Research

DURING THE WORKSHOP

We may take observation notes on how teams engage with the activities.

Notes are **anonymized** — teams are identified by team ID only. No names recorded.

REFLECTION AT THE END

At the end of the session you'll write a short individual reflection.

This is a **normal course activity** — not a research-specific.

OPTIONAL: CONTRIBUTE TO RESEARCH

Share your thoughts about the session anonymously via MS Forms (link shared during session).

Team ID only — no name, no student number.

YOUR RIGHTS

Participation is entirely voluntary. No grade consequence either way.

Questions? Contact: m.a.gomezmaureira@utwente.nl or Ethics Committee HSS.

Persona Workshop: Part 1

 AI Welcome

 55min

Group Split + Roles

GROUP A →  CRITICAL ART CRITIC

GROUP B →  NAÏVE AUDIENCE MEMBER

ROLES PER SUB-GROUP

KEYBOARD HOLDER

LLM chat open. Types what the group agrees to send – reads responses to the other .

CONCEPT HOLDER

Portfolio / notes open. Keeps concept material visible. Watches how the group engages.

FAILURE WATCHER

Whiteboard open. Notes output failures against the persona checklist with turn numbers.

Everyone decides together — roles are screen assignments, not hierarchy!

Preparation: Read the Prompt

10min

Before opening any LLM

As a group, read your persona's system prompt. Use the whiteboard to make notes about your predictions:

1. Which line do you think will most impact how the AI replies to you?
2. Which line do you think the AI is most likely to fail to follow?
3. What is the first thing the persona will push back on?

*Don't skip over this part
— understand the prompt before you use it!*

10:00

Start

Edit

Round 1: Test Your Concept

30min

Sub-Group work with your persona

Use your assigned persona to test your team's concept and statement.

- Discuss what to ask and how to interpret responses **together** before formulating a prompt
- **Failure watcher:** track the failure list on your whiteboard while the dialogue runs
- Check your prompt predictions against what actually happens

30:00

Start

Edit

Report-Back

15min

Sub-groups re-join

1. Share most important insights of the interaction
2. Moments the persona failed to enact its prompt
3. What could change based on the interaction?

Place your perspectives alongside each other.

What did one group see that the other didn't?

*Don't forget to make notes throughout (e.g. whiteboard)
— the session exists to create material for further work!*

15:00

Start

Edit

🕒 15min

REMINDER

- Buddycheck 1 submitted?
- AI & Me entry tonight: document the persona interaction – including a prompt autopsy

Round 2: Intra-Team Mediator

Full team together

The whole team works with the Intra-Team Mediator.

Use tensions or open questions from the report-back as starting material.

Optional prompt for teams that finish early: *“Would this conversation have gone differently if we ran it among ourselves, without the AI? In what way?”*

20:00

Start

Edit

Debrief Part A: Concept Reflection

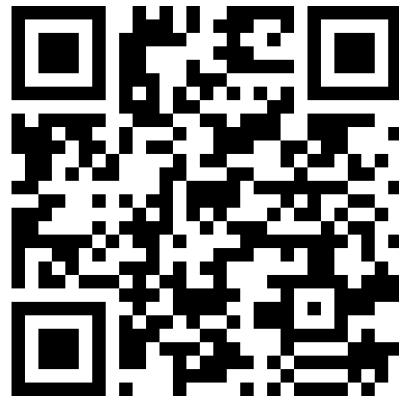

15min

While the dialogue is fresh

Answer these questions before discussing them:

1. Did your concept change because of this dialogue?
2. If yes: point out specifics of what and why.
If no: what kept the interaction from being useful?

Then open discussion: what did we accept,
reject, or change — and why?

SUTQ: Share your
experience 🙏

15:00

Start

Edit

Debrief Part B: AI & Me Reflection

Each person answers:

1. Where did the AI persona actually push you in these rounds?
2. What was most useful; what was the least useful?
3. What would you do differently if you ran this interaction again?
4. What does this session tell you about how you want to use AI as a work tool going forward?

**Make use of this material today for
your AI & ME logs!**

10:00

Start

Edit

Break

🕒 10min

REMINDER

- Buddycheck 1 submitted?
- AI & Me entry tonight: document the persona interaction – including a prompt autopsy

SUTQ: Share your
experience 🙏

Turning Your Statement and Concept into a Design Question

No AI

45min

Statement and Concept → Design Question

45min

Team work

Step 1 — Read your artistic statement and concept again.

Step 2 — Identify claims it makes about what an audience should experience.

Step 3 — Write it as a testable design question of the form:

“Does this [interaction/element/moment] produce [intended experience] for an audience who knows nothing about our concept?”

Decide on a testable question about audience experience and note it in your MS Teams channel.
Think about how you could test it!

45:00

Start

Edit

*Last activity
for today!*

Art [88] Impact

See you at S8 — Week 5, Friday!
